

SHIP LOADER - MALAYSIA

INCREASED CAPACITIES IN MALAYSIAN PORT

Kedah Cement placed this order with Siwertell for a ship loader, in order to increase the loading capacity, following an upgrade of the Kedah Cement production plant on Langkawi Island, Malaysia for an estimated annual throughput of 1.5 million tonnes.

About

The scissor arm design allows the Siwertell loader to reach any point in the ship's hold, even though it is pedestal-mounted - this machine is easily manoeuvred.

One basic criterion when designing a Siwertell ship loader is to achieve dust-free operation with minimal spillage.

The screw conveyor system offers a completely enclosed conveying line, from the feeding point to the discharge in the ship's hold, which contributes to fulfilling these criteria.

Main features

- compact design
- light weight
- totally enclosed system
- controlled air flow

FACTS

CATEGORIES:

- Ship Loading

MATERIALS:

- Cement

CUSTOMER:

Kedah Cement Sdn. BHD.

ADDITIONAL FACTS:

Model	Screw conveyor type, stationary
Loading spout	For open or closed hatches
Loading capacity	1,000t/h
Maximum ship size	30,000 dwt
Total weight	96t

PRODUCTS:

- Ship loading

LOCATION:

Malaysia
