

## CUSTOMER CASE STUDY

# Mt. Poso Cogeneration Company Biomass Power Plant

### Company:

Millenium Energy

### Location:

Bakersfield, California

### Date of Completion:

May 2012

### Description:

BRUKS Rockwood designed and supplied a complete biomass materials handling system to fuel a 44 MW plant for Mt. Poso Cogeneration Company. This fully automated fuel yard includes one 75' Back On Truck Dump and Receiving Hopper, 2 Receiving Hoppers for self unloading trucks, and a Stacker Reclaimer with 4,000,000 ft<sup>3</sup> of storage capacity. To meet California state requirements, installation of dust suppression systems on all receiving hoppers and transfer points as well as BRUKS TUBULATOR™ conveyors minimize possible dusting.
