Southern Power Nacogdoches Generating Facility

Company:

Southern Power

Location:

Nacogdoches, Texas

Date of Completion:

June 2012

Description:

BRUKS Rockwood supplied the Truck Dumpers and Stacker Reclaimer being employed at Southern Power's Nacogdoches Generating facility. This 100 MW facility is one of the largest biomass plants in the United States. Designed to receive wood waste materials via chip trailers, this facility will burn approximately one (1) million tons of fuel annually. The chip trailers will be off loaded using two of the BRUKS Drive over Truck Dumpers. Once received, the materials are then stockpiled using the fully automated 4 million cubic foot BRUKS Stacker Reclaimer.
