

CUSTOMER CASE STUDY

Rentech – Linear Overpile Reclaimer

Company:

Rentech

Location:

Wawa, Ontario, Canada

Date of Completion:

November 2014

Description:

BRUKS designed and supplied a Linear Overpile Reclaimer for Rentech's indoor facility in Wawa, Ontario. The machine travels on rails alongside a 37 foot wide by 165 foot long pile. The 38' long boom reclaims up to 100 tons per hour. Material then moves up the incline pan and directly onto a take-away conveyor. The system is equipped with integrated controls allowing for responsive reclaim, as well as automatic operation once travel limits are set.
