Green Circle Bio Energy Inc. Energy Pellet Plant

Company:

Green Circle Bio Energy

Location:

Cottdale, Florida

Date of Completion:

April 2008

Description:

BRUKS Rockwood was selected to provide complete engineering and equipment to process and feed raw material at Green Circle's wood pellet plant. The mill receives material by a truck receiving station as well as a log debarking and chipping line. Wood chips and bark are stored with two stacker reclaimer's in 2,000,000 and 400,000 cubic feet piles respectively. Also included are BRUKS Tubulator™ conveyors which account for 90% of the conveyors used in this fully automated system which produces 550,000 tons of pellets annually.
