

CUSTOMER CASE STUDY

Keystone Terminal

Company:

Keystone Terminal

Location:

Jacksonville, FL

Date of Completion:

April 2015

Description:

BRUKS was selected to provide complete engineering and equipment supply at Keystone's wood chip export terminal in Jacksonville, FL. BRUKS supplied a 75' Drive-over Truck Platform and a 16' Receiving Hopper to receive and transfer wood chips. The Drive-over Truck Dumper can dump 7-8 truck loads per hour continuously, and the Receiving Hopper has a capacity of 6,000 feet³ with an output flow of 250 tons per hour.
